DAIREN INDUSTRIES IMPROVE PRODUCTION AND QUALITY

The Dairen dyeworks has succeeded in producing a quality of sulfur black 2.8 percent better than the best produced during Japanese control.

Northeast factories have stepped up production.

SHIP REPAIR YARD IMPROVES OUTPUT -- Dairen, Jen-min Jih-pao, 16 Nov 50

Under the stimulus of patriotism, the workers of the ship repair yard of the Dairen Harbor Office stepped up their October production by 9.9 percent and reached their goal before the end of the month. At the same time they improved the quality of the work done.

Workmen have shown a new burst of resourcefulness and inventiveness and have made many time- and labor-saving improvements in their equipment.

Whereas formerly boat crews were idle while their fishing boats were being repaired, they have now been integrated into the repair crews to work at operations requiring less skill thus cutting the average repair period by 4 days. They are thus able to catch more fish and thereby aid the country against US imperialism.

DYE WORKS PRODUCES SUPERIOR SULFUR BLACK -- Dairen, Jen-min Jih-pao, 12 Nov 50

The Dairen Dyeworks, by strenuous efforts and the institution of a very careful inspection system, has succeeded in producing powdered sulfur black of a quality 2.8 percent better than the best produced during the Manchukuo regime.

50X1-HUM

The moisture content of sulfur black in paste form has been decreased, making the drying process easier. Quality of the paste form has been improved by a ratio of 1 to 5.83 [sic].

NORTHEAST STEEL WORKS UPS OUTPUT -- Shanghai, Hsin-Wen Jih-pao, 11 Nov 50

Northeast Peoples Broadcasting Station, 9 November -- Since the Anti-American Campaign was started in the factories and mines of the Northeast, production has been noticeably stepped up. At a certain steel refinery in the Northeast, workmen completed the year's production by 2 November 1950 and reduced waste by 500 tons.
